

FUNKASH TECHNOLOGY LIMITED

RC 8114457

Website Copy & Implementation Spec

Developer hand-off — final content to implement on funkash.com

FOR

The Funkash web engineering team

Prepared for Olumide Funkash Ogunwo — Founder & CEO

June 2026 · Internal

How to use this document

This is the **final copy** for each part of the website. Work section by section: find the matching area on the page (each block names its **LOCATION**), then replace what is there with the text in the **PASTE** block.

- **PASTE** blocks are the exact words to put on the site. Copy them as-is.
- **ACTION** blocks are structural or technical tasks (links, meta tags, legal, removals).
- **CONFIRM** notes flag the few details the founder still needs to lock (marked in §10).

NOTE This spec is written as target content rather than a line-by-line diff of the current site (the live pages are JavaScript-rendered and could not be read programmatically for exact-string matching). Implement these as the new content for each section. If you prefer exact find-and-replace, send current page text or screenshots and it will be mapped 1:1.

1 Site-wide (applies to every page)

1.1 Legal entity name — use everywhere

LOCATION Footer, About, legal pages, page metadata, structured data

PASTE — FINAL COPY

Funkash Technology

RC 8114457

ACTION Replace any other entity name (e.g. any “Holdings” or “Family Holdings” variant) with “Funkash Technology Limited” everywhere it appears.

1.2 Footer

LOCATION Global footer, all pages

PASTE — FINAL COPY

Funkash Technology (RC 8114457)

Flat 21, Adeline Court, Banana Island, Ikoyi, Lagos, Nigeria

hello@funkash.com · funkash.com

© 2026 Funkash Technology Limited. All rights reserved.

[Privacy Policy](#) · [Terms of Use](#)

ACTION The Privacy Policy and Terms links must point to real pages — not “#”. A published privacy/NDPR notice is required before any public-sector or partner outreach.

1.3 One contact email

LOCATION Header, footer, contact page, any “email us” link

Use a single public address consistently. Recommended: **hello@funkash.com** for general enquiries. Remove other mixed addresses from public pages.

1.4 Remove the venture-studio / investor framing

ACTION The venture-studio chapter has concluded. Remove any “venture firm”, “we invest in”, or “future of investing / sign up for the alpha” language and calls-to-action. The company is now presented as product- and engineering-focused (see §2–§4). Products previously built may still be listed as past work, but not as an investment thesis.

1.5 Page titles & meta descriptions (unique per page)

LOCATION <title> and <meta name=“description”> in each page head

PASTE — FINAL COPY

HOME

title: Funkash Technology — Engineering Systems That Solve Large Problems

desc: Funkash Technology is a product and engineering company building institution-grade software across finance, fraud defence, AI workforce, and governance.

ABOUT

title: About — Funkash Technology

desc: A product and engineering company solving large, structural problems for banks, enterprises, and the public sector.

PRODUCTS

title: The Funkash Universe – Our Products | Funkash Technology

desc: Our flagship platforms across financial control, fraud intelligence, AI workforce, policy intelligence, and workforce capability.

CONTACT

title: Contact – Funkash Technology

desc: Talk to Funkash Technology about partnerships and solutions.

ACTION Also ensure every navigation link and button resolves to a real page and one consistent route structure (no “Projects” vs “Portfolio” split, and CTAs must not point to the wrong page).

2 Home — hero & positioning

2.1 Hero headline + sub-headline

LOCATION *Top of the homepage, main hero*

PASTE — FINAL COPY

HEADLINE:

We engineer the systems that solve large problems.

SUB-HEADLINE:

Funkash Technology is a product and engineering company building institution-grade software for finance, fraud defence, workforce, and governance.

Alternative headline (if a shorter line is preferred):

PASTE — FINAL COPY

Big problems, engineered.

2.2 Primary calls-to-action

LOCATION *Hero buttons*

PASTE — FINAL COPY

Primary button: Partner with us → /contact

Secondary button: Explore our products → /products

2.3 What we do

LOCATION *Intro section directly beneath the hero*

PASTE — FINAL COPY

We are a product- and engineering-focused technology company. We build and operate software that solves large, structural problems – in how money moves, how fraud is stopped, how organisations work, and how policy is understood.

We build for institutions: banks, enterprises, and the public sector. Our focus today is our own flagship platforms – the Funkash Universe.

3 The Funkash Universe — flagship products

This is the centrepiece of the site. Give it a dedicated, prominent section on the homepage and its own page. Each product is a card with the name and the description below.

3.1 Section intro

LOCATION *Products section heading + intro*

PASTE — FINAL COPY

THE FUNKASH UNIVERSE

Our flagship products – a connected set of platforms engineered to solve hard problems across finance, security, work, and governance.

3.2 Product cards (in this order)

PASTE — PRODUCT CARD

FLOWPENSE

The financial control layer between an enterprise's ERP and its bank. Flowpense automates accounts payable, approvals, spend controls, and reconciliation – so finance teams move money with speed and control.

PASTE — PRODUCT CARD

AEGIS BIP

A behavioural identity platform that detects fraud and mule networks from how people actually transact – not just who they claim to be. Aegis turns behaviour into a real-time defence layer.

PASTE — PRODUCT CARD

BOTPAA

AI workforce infrastructure. Botpaa lets organisations deploy reliable AI employees into real operations – trained, governed, and accountable – to do work, not just answer questions.

PASTE — PRODUCT CARD

MALTIDA

A policy and regulation intelligence engine. Maltida turns dense policy and regulatory text into structured, queryable insight, so teams can understand and act on the rules that govern them.

PASTE — PRODUCT CARD

EDUFLEX

A workforce capability system. Eduflex measures skills and builds them across an organisation through a continuous assess, train, practise, and evaluate loop.

NOTE Botpaa keeps its own product identity and must never be called a “bot”, “chatbot”, or “assistant” anywhere on the site — always “AI workforce” or “AI employees”.

4 About & company story

4.1 Company story

LOCATION *About page, main body*

PASTE — FINAL COPY

Funkash Technology Limited is a product and engineering company that builds software for large, structural problems.

We began by building alongside founders as a venture studio; that chapter is complete. Today we concentrate on engineering and operating our own flagship platforms – the Funkash Universe – across financial infrastructure, fraud intelligence, AI workforce, policy intelligence, and workforce capability.

We build for institutions: banks, enterprises, and the public sector. Headquartered in Lagos, we work through offices and partners across multiple countries.

4.2 Impact / stats block

LOCATION *The numbers strip on Home and/or About*

Replace the previous figures with these accurate ones:

Figure	Label
17+	Years of collective engineering experience
1	Office — Lagos HQ
6	Partner countries
5	Flagship products

CONFIRM Two figures to lock before publishing: the basis for “17+ years”, and whether to name the two international office locations and the five partner countries (see §10). The old “7 active countries” line should be removed — it predates the Turkey and

Figure	Label
Cyprus office closures.	

5 Leadership / team

Show the founder only for now. Add the rest of the team, with real photographs, once everyone is back in office.

LOCATION *Team / Leadership section*

PASTE — FINAL COPY

Olumide Funkash Ogunwo
Founder & Chief Executive Officer

Olumide founded Funkash Technology to build institution-grade software for problems that matter at scale – from enterprise financial control to behavioural fraud defence and AI workforce infrastructure. He leads the company's product and engineering direction across the Funkash Universe.

ACTION Use a single founder card now. Leave a clearly-structured, easily-extendable team grid so additional members and photos can be added later without a redesign. Do not use placeholder stock avatars.

6 Contact

LOCATION *Contact page*

PASTE — FINAL COPY

Let's build what's next.

Whether you're a bank, an enterprise, or a public institution, we'd like to hear from you.

Email: hello@funkash.com

Office: Flat 21, Adeline Court, Banana Island, Ikoyi, Lagos, Nigeria

ACTION Add a simple enquiry routing (e.g. a dropdown: Partnership · Enterprise solution · Public sector · Press) and, ideally, a booking link for serious inbound. Ensure the form actually sends and confirms.

7 Legal & compliance

- Publish a real **Privacy Policy / NDPR notice** and **Terms of Use**; link them from the footer.
- Show entity and registration in the footer: Funkash Technology Limited, RC 8114457.
- Registered address: Flat 21, Adeline Court, Banana Island, Ikoyi, Lagos, Nigeria.

8 Technical checklist for the engineer

#	Task
1	Every navigation link, footer link, and button resolves to a real page (one consistent route structure).

#	Task
2	CTAs point to the correct pages (Partner with us → /contact, Explore products → /products).
3	Privacy Policy and Terms links open real pages (no “#”).
4	Unique <title> and meta description on every page (per §1.5).
5	One public email everywhere (hello@funkash.com).
6	Entity name consistent (Funkash Technology Limited, RC 8114457).
7	No venture-studio / investor CTAs remain (per §1.4).
8	Contact form submits and confirms; enquiry routing works.
9	Any logo/partner marks shown reflect a real, permissioned relationship; remove placeholders.
10	Full proofread by a second person before publishing.

9 Summary of changes

Area	Change
Identity	From mixed (tech / venture firm / investor) to a single, product- and engineering-focused company solving large problems.
Products	Elevate the Funkash Universe flagships (Flowpense, Aegis BIP, Botpaa, Maltida, Eduflex) as the centrepiece.
Venture studio	Framed as completed past work; investor/“future of investing” CTAs removed.
Stats	“7 countries” replaced with 3 offices, 5 partner countries, 5 flagship products.
Team	Founder only for now; extendable grid for later.
Legal	Funkash Technology Limited, RC 8114457; real Privacy/Terms; Banana Island address.
Contact	One email (hello@funkash.com); routed enquiries; working form.
Technical	Fix routing, CTAs, unique meta, proofread.

10 Details for the founder to confirm

A handful of items the engineer should leave as marked until you confirm:

- The basis for the “17+ years” figure (keep, change, or remove).
- The two international office locations to name (post Turkey and Cyprus closures) — or keep it as “two international offices”.
- Whether to name the five partner countries on the site.
- Confirm hello@funkash.com as the single public email (vs. oogunwo@funkash.com).
- Whether to list earlier venture-studio products as “past work”, and if so, which ones.
